Time Table

Sunday, 18 Oct 2009

- | | |
|---------------|--|
| 08.30 - 09.00 | Registration |
| 09.00 - 10.30 | Introducing Esthetic Dentistry in General Dental Practice As the demand of aesthetic dental treatments increases drastically over the past few years, general dental practitioners will need to prepare their dental team and equip their dental office for this change. The discussion will cover dental office set up, dental team mind-set preparation & essential equipments for providing aesthetic dental treatments. |
| 10.30 - 11.00 | Coffee Break |
| 11.00 - 12.30 | Reconstruction of Smile Line Reconstruction of smile line is one of the biggest challenges in aesthetic dentistry. As the planning for reconstruction not only involve the teeth but also the surrounding soft tissues. The success of this procedure can only be achieved by excellent teamwork between the dentist and the dental technician. We will cover the data collection, planning, communications with patient & dental technician for optimum aesthetic results in this presentation. |
| 12.30 - 13.30 | Lunch Break |
| 13.30 - 14.30 | Esthetic Temporary Restoration Over the years, the demand for highly aesthetic permanent restorations increase and so as the temporary restorations. A somewhat tooth look-alike block on prepared tooth is no longer acceptable. A realistic and highly aesthetic temporary restoration not |

Time Table

Sunday, 18 Oct 2009

- | | |
|---------------|--|
| 14.30 - 15.30 | Presentation of Treatment Plan Treatment plan for dental treatment is as important as a blueprint to building a skyscraper. The more complex is the dental treatment, the more important to have a dental treatment plan and the back up plan. The presentation of treatment plan helps patient to understand his oral condition and derive with a decision for what the dentist has proposed. We will discuss the stages of formulating a treatment plan and key points during presentation to enhance conversion rate. |
| 15.30 - 16.00 | Coffee Break |
| 16.00 - 17.00 | Advances in Esthetic Dentistry In the recent years, there are a few fields that have been rapidly developed over the last few years and brought much attention to the dentists. All these improvements have brought great impact on everyday dentistry as it increases the patients' comfort, increase in efficiencies in procedures, increase profit margins and increase the quality of work. We will discuss CAD-CAM dentistry, laser application in dentistry and rotary instruments in Endodontic. |
